## About

I'm a self taught Frontend Developer with 3 years of experience. Made work for big brands such as Google and T-Mobile. Worked on complex applications like a video chat and an augmented reality map. I'm a team player, always looking to improve myself and others, love to share knowledge and build amazing products.

## Experience

### Frontend Developer @ [Alea](#)

Apr 2022 - Present // Barcelona

- Serve as the main Frontend Developer of the team, responsible for our applications and of making decisions about technologies and architecture.
- Work in different products with a micro frontend architecture.
- Our projects: a CMS with more than 10.000 games, a client application with graphs and a full calendar, the main company website made with Next Js and a CMS with translations.
- Technologies: TypeScript, React, AWS, Redux, Jest, Strapi, Sass/CSS, Styled Components, Git, Next Js, Zustand and React Query.
- I'm part of an international team using scrum methodology, doing Test Driven Development and code reviews.

### Frontend Developer @ [MediaMonks](#)

Aug 2021 - Mar 2022 // Buenos Aires

- Served as a Frontend Developer on an international team.
- Worked in: a team performance review web application, an augmented reality map for a park, a video chat experience for T-Mobile and an nft collectibles application for Verizon.
- Technologies: TypeScript, React, Redux, Sass/CSS, Styled Components, Gsap, 8th wall and other React libraries.
- Worked with many developers, QAs, designers, and project managers, using agile methodologies and doing code reviews.

### Software Engineer, Web Platforms @ [R/GA](#)

Dec 2020 - Aug 2021 // Buenos Aires

- Worked as a Frontend Developer for the Google team, specifically for Google for Small Business and the Google for Doodles websites.
- Our team managed both sites, we were responsible for developing new features, making updates and building internal pages in multiple languages.
- Technologies: TypeScript, Angular, Python, Jinja and a multilingual CMS tool.
- Worked in a team with other developers, a tech lead, a QA and a project manager, using agile methodology and doing code reviews.

### Frontend Developer @ [Nodus](#)

May 2020 - Dec 2020 // Buenos Aires

- Started as a Junior Frontend Developer, gained more responsibility, independence and confidence from my manager.
- Developed an ecommerce, a content manager, an interactive tutorial for Google Ads, a website for an agency and corporate html emails.
- Technologies: React, Redux, Sass/CSS, TypeScript, Git, HTML and Sass/CSS.
